

CLOSE THE BORDER!

No country can maintain its independence as a sovereign state if it is unwilling or unable to defend its own borders. But that is exactly the situation that we find ourselves in today. Despite all sorts of pronouncements from Washington to the contrary, it is clear to everyone who has eyes to see and ears to hear that America's borders are wide open to every Third World invader who seeks entry. That applies especially to our southern border with Mexico. Estimates of the number of *illegal aliens* in our midst run as high as 15 million – or more!

They take our jobs, ruin our schools, pollute our culture, run us out of our cities and neighborhoods, burden us with social service expenses and drive the rate of violent crime through the roof.

It has been suggested that we *build a wall* to keep the non-White invaders out. That is not a bad idea, although militarizing the US/Mexican border would be faster, cheaper and more effective.

But the bottom line is that whatever method we use, the border needs to be shut immediately and securely. And beyond that, the illegal invaders who are already among us need to be expelled. Ideally, this should be done peacefully but firmly.

In days gone by, our forefathers were able to boast that, "*Racial purity is America's security.*" We need to make that true once more.

Make America WHITE again – and greatness will follow!
